

### Definition

A dwelling is a building or portion of a building being used, adapted, designed or intended to be used for the purpose of human habitation on a permanent basis by a single person, a single family or no more than six persons who are not a single family.

### Frequently asked questions

#### Do I need a Building Permit?

The Building Act 2011 states that any new dwelling, additions and structural alterations to a dwelling require a Building Permit. A Building Permit may not be required for the renovation, alteration, improvement repair or maintenance of a building or incidental structure, providing the building work will not adversely affect the structural soundness of the building or incidental structure.

#### How long does it take to get a Building Permit?

The Building Act 2011 sets time frames in which the Shire has to assess and determine an application for a Building Permit. The applicable timeframe depends on whether the Building Application is Uncertified or Certified. It is important that you are aware of the allowed time frames prior to lodging your application and that your application documentation is complete.

Shire of Capel reserves the right to request additional information if it is deemed necessary following a detailed assessment of the application. Should further information be required in order to assess the Building Application, the applicant may be given up to 21 calendar days in which to provide the outstanding information. If the information is not received within the 21 days, the application may be refused unless mutual consent has been granted for an extended period.

#### Uncertified Building Applications:

An Uncertified Building Application can be submitted for Class 1 structures such as a dwelling.

The Shire has up to 25 business days from the date of lodgement to assess the application and issue a Building Permit. The required Certificate of Design Compliance will be issued by the Shire as part of the application process.

#### Certified Building Applications:

A Certified Building Application can be submitted for all Class of structures.

Prior to lodging a Certified Building Application to the Shire, a private Building Surveying Practitioner would need to be engaged to issue a Certificate of Design Compliance.

The Shire has up to 10 business days from the date of lodgement to assess the application and issue a Building Permit.

#### How long until my permit expires?

A Building Permit is valid for two years from the date on which it was granted.

If more time is required to complete the building works, you can apply for an extension of time up to a further 6 months by making a formal application and paying the prescribed fee.

#### What happens when I have completed my building works?

The nominated Builder on the Building Permit must submit a Notice of Completion BA7 form to the Shire within 7 days of completing the prescribed building works.

## Building Application Checklist – BA2 Uncertified Application

Approvals and Forms	Further Information	Attached	
		Yes	N/A
<b>Development Approval</b>	Development approval may be required prior to lodgement of a building application. Planning Information Sheets are available from the Shire's Website <a href="http://www.capel.wa.gov.au">www.capel.wa.gov.au</a> or from the front counter at the Shire's Administration Office.
